

PATENT

Atty Dkt: 203442107020

Serial No.: 08/443,982

Page 34, line 3, change "pharmaceutical" to -pharmaceutical- line 6, after "disorders" insert -or biological processes-, and lines 12 to 13, from ", eg.," to "mg/ml".

Page 41, line 10, change "10₆" to "10⁶".

Page 42, line 25, after "methods for" insert -modulating biological process and- and line 27, after "diseases" insert -and biological processes-.

On page 46, line 27, after the sequence ending "...CAA GTC" please insert -(Seq. ID No. 7)-.

In the claims:

Please amend the claims under the provisions of 37 C.F.R. § 1.121(b) by deleting the bracketed material and inserting the underlined material as follows:

a¹ 6. (amended) A [The] FADD protein or polypeptide [of any of claims 1, 3, 4, or 5] which has been recombinantly produced and isolated from a host cell.

a² 15. (amended) An antibody capable of specifically forming an antibody complex with a FADD protein or polypeptide [the protein of any of claims 1 to 5].

a³ 20. (amended) A process for producing a FADD protein or polypeptide [of claim 1 or the polypeptide of claim 5], which comprises providing a host cell, wherein the host cell contains a nucleic acid molecule encoding the FADD protein or polypeptide [mammalian protein] and wherein the nucleic acid molecule is operatively linked to a promoter of RNA transcription, growing the host cell under suitable conditions such that the nucleic acid is transcribed and translated into protein.
